

Receiver User Manual :

1. This unit is controlled by advanced micro processor.
2. Single Channel Mode:
 - Power on the receiver. Press the CHx button that corresponds to the Transmitter channel in use.
 - Repeat this procedure whenever the receiver is first turned on.
3. If more than one camera is installed :
 - Install each camera respectively according to the camera installation procedure.
 - Set the cameras to channel 1,2,3,4 respectively according to the set up.
 - Power on receiver and LED indicator will lit. Press the SET key and then press the CH1,CH2,CH3,or CH4 key according to your setup on cameras. When all set, press the SET key again so the set up process is complete. The LED will extinguish and the channel LED indicator will start blinking order by your setup.
 - If desire to receiver a particular transmission channel from a camera, simply press the CH1,CH2,CH3,or CH4 key.
 - If desire to adjust timer for scanning, please use a regular screw driver to adjust the key clockwise. This will slow down the timing for scanning.
 - Press MUTE key for quiet transmission.
